Examples of Credit Balances. A credit balance is normal and expected for the following accounts: Liability accounts such as Accounts Payable, Notes Payable, Wages Payable, Interest Payable, Income Taxes Payable, Customer Deposits, Deferred Income Taxes, etc. Hence, a credit balance in Accounts Payable indicates the amount owed to vendors. (If a liability account would have a debit balance it indicates that the company has paid more than the amount owed, has made an incorrect entry, etc.)

What is a credit balance? | AccountingCoach

An account has a debit balance if the total of the debit side of it is more than the sum of the credit side. Similarly, an account shall have a credit balance if the amount of the credit side is more than the total of the debit side. Continuing with the above example, US\$500 will be added on the debit side of the ledger of cash a/c.

Debits and Credits: Introduction, Journal and ledger, Usage

The debits and credits, which are actions of opposing nature, are collected separately on either side of the account. Ledger account balance is the net amount obtained by setting off the sum of all debits and sum of all credits against each other. In setting off, we always assume that the greater sum is being set off from the smaller one. Thus the ledger account balance is also interpreted as . Debit side total – Credit side total (if debit side total is greater)

Ledger Account Balancing - Future Accountant

Trade Receivables (debtors) accounts generally shows debit balance in the business books. This balance represents money owed by the trade receivable (debtor) to the business. However some times trade receivable (debtor) account may show a credit balance. It indicates business owes money to the trade receivable.
