The Roots-type blower is a positive displacement lobe pump which operates by pumping a fluid with a pair of meshing lobes resembling a set of stretched gears. Fluid is trapped in pockets surrounding the lobes and carried from the intake side to the exhaust. The most common application of the Roots-type blower has been as the induction device on two-stroke diesel engines, such as those produced by Detroit Diesel and Electro-Motive Diesel. Roots-type blowers are also used to supercharge Otto cycle

Roots-type supercharger - Wikipedia

A route is a road or a routine way of travel. A root is the underground part of a plant or the source of something. To root is to poke or dig around or to cheer for someone. A rout is a chaotic retreat or a decisive loss. To rout is to defeat soundly. By remembering that roots are in the ground and that boots walk on the ground, you will be able to remember when to use the word root.

Root vs. Route - What's the Difference? - Writing Explained

Community is the place we set down roots, create relationships, and build and live our lives. In this housing affordability crisis, people are being pushed out of their communities by the impacts of racism, inequality, and gentrification. Our work fights this displacement. We embrace community-led development and engage in deep-rooted ...
