Talking to Your Doctor: What to Tell and Why

Sometimes your doctor is unable to identify a physical cause for your symptoms and turns reflexively to stress or anxiety as the explanation, given that the power of the mind to manufacture physical symptoms from psychological disturbances is not only well-documented in the medical literature but a common experience most of us have had (think of "butterflies" in your stomach when you're nervous).

What to Do When Doctors Don't Know What's Wrong | ImagineMD

A wrong diagnosis is considered medical malpractice if the doctor's actions "deviated from the medical standard of care" of similarly trained doctors. Most of the time, wrongful diagnoses occur because of medical providers who: Fail to order appropriate screening for illnesses and diseases Misinterpret lab and test results

When a Wrong Diagnosis Counts as Medical Malpractice

Doctors are better versed in medical care than medical billing. With more than 155,000 ICD-10 codes available, it is possible your doctor could choose the wrong one. If Medicare denies payment for services because of a coding error, you are left to pay out of pocket.

You Pay When Your Doctor Picks the Wrong Diagnosis Code

You should always speak with your doctor before you start, stop, or change any prescribed part of your care plan or treatment. WebMD understands that reading individual, real-life experiences can be a helpful resource, but it is never a substitute for professional medical advice, diagnosis, or treatment from a qualified health care provider.
